UMTS – II 3

---

---

---

---

---

---

---

## RLC

- Tre modalità di funzionamento
- **Transparent**: per servizi a circuito su canali dedicati
- **Unacknowledged**: per servizi a pacchetto datagram, sia su canali dedicati che su canali comuni
- **Acknowledged**: per servizi a pacchetto affidabili, sia su canali dedicati che su canali comuni, scarto delle PDU su
  - base tempo
  - base ritrasmissione
  - ritrasmissione illimitata (cap. del buffer)

## Architettura dell'interfaccia radio

Renato.LoCigno@dit.unitn.it

UMTS – II 5

---

---

---

---

---

---

---

## PDCP

- Packet Data Convergence Protocol
- Protocollo associato ad ogni radio-bearer con organizzazione a pacchetto
- Funzioni:
  - segmentazione/riassembaggio
  - trasferimento dati e (eventuale) consegna in sequenza
  - compressione intestazioni
  - multiplexing

## Third generation bandwidth assignment

## Soft-Handover

- Soft Handover: simultaneous radio link between MS and different BTSs

Renato.LoCigno@dit.unitn.it

UMTS – II 13

---

---

---

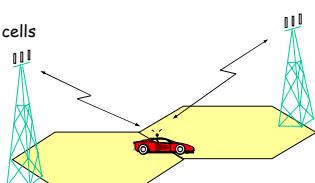

---

---

---

## Soft-Handover

- Advantages
  - SHO gain at cell border
  - Macrodiversity
  - Reduced Tx power (!)
- Disadvantages
  - Code waste
  - Interference on two cells

Renato.LoCigno@dit.unitn.it

UMTS – II 14

---
