

NEW ACM Publications Announcement

Submissions Accepted Early 2018

ACM Transactions on the Internet of Things (TIOT)

Co-Editors-in-Chief

Schahram Dustdar, TU Wien

Gian Pietro Picco, University of Trento

ACM Transactions on the Internet of Things (TIOT) publishes novel research contributions and experience reports broadly related to these topics and their interrelations in the context of IoT, with a focus on system designs, end-to-end architectures, as well as enabling technologies, and whose results and insights are corroborated by a strong experimental component.

Examples of topics relevant to the journal are:

- Real-world applications, application designs, industrial case studies and user experiences of IoT technologies, including standardization and social acceptance
- Communication networks, protocols and interoperability for IoT
- IoT data analytics, machine learning, and associated Web technologies
- Wearable and personal devices, including sensor technologies
- Human-machine and machine-machine interactions
- Edge, fog, and cloud computing architectures
- Novel IoT software architectures, services, middleware as well as future Internet designs
- Fusion of social and physical signals in IoT services
- Non-functional properties of IoT systems, e.g., dependability, timeliness, security and privacy, robustness
- Testbeds for IoT

All submissions are expected to provide experimental evidence of their effectiveness in realistic scenarios (e.g., based on field deployments or user studies), and the related datasets. The submission of purely theoretical or speculative papers is discouraged, and so is the use of simulation as the sole form of experimental validation.

Experience reports about the use or adaptation of known systems and techniques in real-world applications are equally welcome, as these studies elicit precious insights for researchers and practitioners alike. For this type of submissions, the depth, rigor, and realism of the experimental component is key, along with the analysis and expected impact of the lessons learned.
